- ✓ Procure At Right Time
- ✓ Procure Right Quantity
- ✓ Procure Right Quality
- ✓ Procure from Right Place
- ✓ Procure from Right Source

Vproc - The Benefits.

Vproc - Powerful Modular approach

Fast & Accurate – Users can search the online catalogue very quickly to match the item for requisition. All search matching is online and Requisition Forms are auto-generated.

Cross-Functional Processes – End-to-end closed loop processes to ensure zero-defect in procurement. Tightly integrated process to provide full visibility over entire procurement lifecycle.

Price Compliance – ‘Automatic-Checks’ for every receipt and invoice at the line item level and instantly determine if price is correct or off-contract. Load and update price list in the system.

Dynamic Discounting – No more missed discounts! Automated workflow will reduce approval time to 80% by electronic order, receipt and invoice adjudication. This allows you to capture more available discounts.

Time optimized – Suppliers can check the status of every invoice online, eliminating most suppliers calls on invoice and payment status. This will allow you to focus more on mission critical tasks.

IT Easy – Easy deployment and implementation will ease the burden on your IT department for support and maintenance.

Get Better Control ! It is an internet based purchasing system that can connect businesses and their processes straight to supplier providing better control for the business owner to receive goods and services at faster and cheaper rate. Business Owner can have full visibility to the entire Procurement Lifecycle.

Reduce Risks - Through the online system business owner can reduce the risk of overspending or extra-spending. Business owner can maintain the balance between demand and supply.

No Extra Cost or Budget - P2P is internet based purchasing system hence does not call the need to hire extra human resource. Existing user strength can be trained to carry out online-procurement.

Do more with Less ! Online System can optimize the Operational Efficiency of an Organization. Requisition creation, submission, Approval, PO Generation, Goods Receiving and etc are online and '1-Click away' hence the user can have more time to focus on 'Mission-Critical' Activity/ Service.

Consolidation (Purchase, Legal, Services) - Our P2P System can be integrated with existing Systems of Client's Organization hence business owner can achieve the state business consolidation and break the silos.

Easy-To-Use Solution - The System is flexible and User Friendly. Existing user can be trained to use the online procurement very easily.

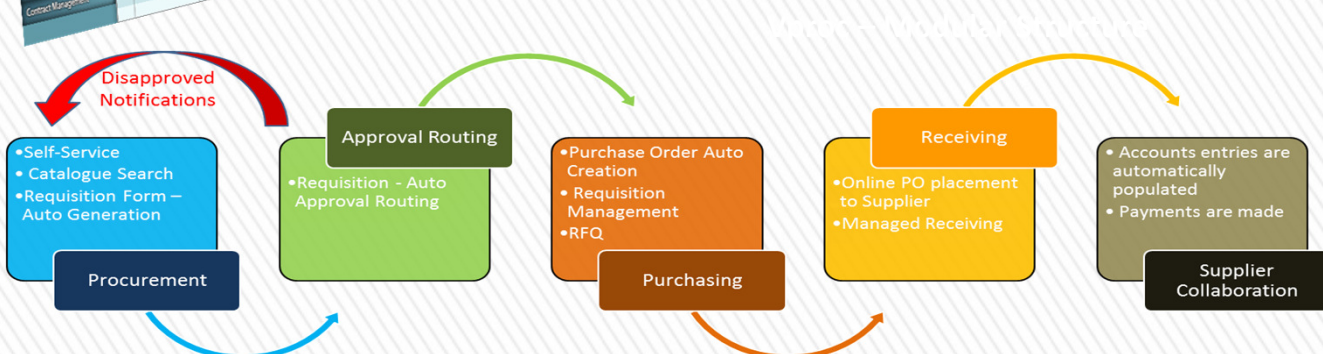

Robust & Flexible Approval Flows - Our P2P System offers robust and flexible approval Flow. Existing business user can be trained to configure the Approval Flow. Business user can edit and add Approval Flows.

Easy Integration - Our P2P can collaborate between suppliers and simplify the procurement process.

Global Platform Green Technology - Our P2P System can run on most available platforms such as Windows, UNIX and etc. Organizations can greatly reduce day-to-day paper work by switching to online summation, approval and goods receiving.
